**SUBJECT:** Services provided by the Nye Regional Medical Center

**SUMMARY**

The Nye Regional Medical Center switched from public to private ownership years ago. It's part nursing home now. The facility is located in Tonopah has a total of 44 beds (26 are long-term care nursing home beds) and two full-time equivalent physicians. There are always two doctors on duty, one for acute cases and one for the ER. There is one RN at the nursing home all times with an assistant CNA, and one director of nursing. Nye Regional Medical Center cannot do surgeries, but it can do MRIs CT scans, X-rays, ultra sounds, and has a lab on-site, a pharmacy, and an out patient clinic. If surgery is needed, they have to go to Las Vegas. Flight for life helicopters people there in emergencies.
